

# Hot-Foil Stamping Equipment Heidelberg Cylinder Model KSB / KSBA

The conventional printing press **HEIDELBERG Cylinder** is converted into hot-stamping equipment. You can order the full equipment set or only the hot stamping attachment.

The equipment is suitable for:

1. Hot stamping with pigment and pattern holographic foils;
2. Hot stamping of holographic registered images.

## Parameters:

Maximum sheet size	40/58 cm
Maximum press area	38/52 cm
Maximum foil roll width	50 cm
Maximum foil roll length (12 mic)	122 m
Maximum work speed	2000 sheet/hour

## Foil system:

Up to 3 foil pull system  
Precision tension control  
Wrinkle removal rolls  
Hologram-registration system with precision tension control (option)

## Heating plate:

2 independent heating zones	2 x 3 kW
Temperature interval	от 0° C до 200° C
Die width	up to 7 mm

Power	15 kW – three phase -380 V
Weight	3100 kg
Dimensions	330/170/200 cm
